PERSONAL PROJECTS

Portfolio Website (01/2022 - Present)

- Summary: A portfolio website to serve as my personal showcase for those inquiring about my experience and services
- Technological Description: A server-less, AWS Amplify Cloud based solution operating through an automated GitHub CI/CD pipeline. The code base is programmed through the React framework using TypeScript and CSS
- Publicly accessible: <https://www.therinmody.com/>

ESPN Trade Tracker (07/2023 - Present)

- Summary: To serve as a trade hub for my Fantasy Football Keeper League. This app allows members of the league to view all team assets and make trades that involve future draft picks. This functionality is not available through ESPN's fantasy application
- Technological Description: This app has a front-end built on a React framework and has a back-end that consists of various Azure function apps written in Python. All cloud infrastructure was built with Infrastructure as Code (Terraform) and has a GitHub CI/CD pipeline for updates to the apps back-end functions
- Currently under development

ORGANIZATIONS

2478818 Alberta Inc. (01/2023 - Present)

President

Calgary Public Library (03/2023 - Present)

Volunteer - Tech Mentor
